

*For many appliances, off isn't really off.
The equivalent of*

17 coal-fired power plants

are used in the United States to power our devices when they are *turned off*.

That's 5-10% of the energy we use!

(US News & World Report)

Kill the phantom load:

UNPLUG YOUR DEVICES WHEN NOT IN USE

SUSTAINABLE POMONA

October 2009: POWER DOWN!

In 08-09, Pomona's energy use emitted

12,420.2

metric tons of greenhouse gases.

That's about **439**

times as much gases that are not emitted because of Pomona's solar arrays.

Help Conserve:

REDUCE YOUR ENERGY USE!

SUSTAINABLE POMONA

October 2009: POWER DOWN!

Although Americans account for only

5% of the world's population, we use **26%** of the world's energy.

(Solar Energy International)

Help eliminate energy injustices:

USE LESS POWER

SUSTAINABLE POMONA

October 2009: POWER DOWN!

During its 10,000-hour lifetime,

a **CFL** will emit about **334 lbs. of carbon**, compared to **1,005 lbs. of carbon** from the more than **13 incandescent bulbs** it would take to produce the same amount of light.

(Energy Star)

Make the switch: **USE CFLs!**

(they're free from the Sustainability Integration Office)
